# Subject index

- accidents**, Human factors in accidents, **369**  
Preventable anesthesia mishaps: a study of human factors, **277**
- accreditation**, Evaluation of quality improvement programmes, **270**
- Action points**, Action points, **108, 204, 300, 394**
- acupuncture**, Acupuncture, **92**
- adverse events**, A system of medical error disclosure, **64**  
Barriers to incident reporting in a healthcare system, **15**  
Barriers to incident reporting, **7**  
Information technology and medication safety: what is the benefit?, **261**  
Learning from prescribing errors, **258**  
Telling patients the truth: a systems approach to disclosing adverse events, **7**
- anaesthesia**, Human factors in accidents, **369**  
Pediatric Peri-Operative Cardiac Arrest (POCA) Registry, **210**  
Preventable anesthesia mishaps: a study of human factors, **277**  
Unexpected cardiac arrest among children during surgery: a North American registry to elucidate the incidence and causes of anesthesia related cardiac arrest, **252**
- angina**, Quality assessment for three common conditions in primary care: validity and reliability of review criteria developed by expert panels for angina, asthma and type 2 diabetes, **125**
- anxiety**, Anxiety as a barrier to risk management, **115**
- appropriateness**, Development of explicit criteria for cholecystectomy, **320**
- asthma**, Inhaler devices for the treatment of asthma and chronic obstructive airways disease (COPD), **376**  
Quality assessment for three common conditions in primary care: validity and reliability of review criteria developed by expert panels for angina, asthma and type 2 diabetes, **125**
- atrial fibrillation**, Development and description of a decision analysis based decision support tool for stroke prevention in atrial fibrillation, **25**
- Bristol Inquiry**, After Bristol: putting patients at the centre, **186**  
Patient centred care: essential but probably not sufficient, **117**
- Bruce Psaty**, Bruce Psaty and the risks of calcium channel blockers, **294**
- calcium channel blockers**, Bruce Psaty and the risks of calcium channel blockers, **294**
- cardiac arrest**, Pediatric Peri-Operative Cardiac Arrest (POCA) Registry, **210**  
Unexpected cardiac arrest among children during surgery: a North American registry to elucidate the incidence and causes of anesthesia related cardiac arrest, **252**
- change management**, Ingredients for change: revisiting a conceptual framework, **174**  
Quality improvement research: understanding the science of change in health care, **110**
- children**, Pediatric Peri-Operative Cardiac Arrest (POCA) Registry, **210**  
Unexpected cardiac arrest among children during surgery: a North American registry to elucidate the incidence and causes of anesthesia related cardiac arrest, **252**
- cholecystectomy**, Development of explicit criteria for cholecystectomy, **320**
- chronic fatigue syndrome**, Interventions for the treatment and management of chronic fatigue syndrome/myalgic encephalomyelitis, **284**
- chronic obstructive pulmonary disease**, Inhaler devices for the treatment of asthma and chronic obstructive airways disease (COPD), **376**
- Cleveland Health Quality Choice**, Cleveland Health Quality Choice was a failure, not a martyr, **391**  
Too good to last: did Cleveland Health Quality Choice leave a legacy and lessons to be learned?, **202**
- clinical audit**, Progress of unit based quality improvement: an evaluation of a support strategy, **308**
- clinical governance**, Implementing clinical governance in English primary care groups/trusts: reconciling quality improvement and quality assurance, **9**  
Why don't physicians enthusiastically support quality improvement programmes?, **6**
- clinical guidance programme**, Development and preliminary evaluation of a clinical guidance programme for the decision about prophylactic oophorectomy in women undergoing a hysterectomy, **32**
- clinical microsystems**, Improving safety on the front lines: the role of clinical microsystems, **45**
- cognitive engineering**, From patients to politicians: a cognitive engineering view of patient safety, **302**
- collaboratives**, Optimizing quality collaboratives, **307**  
Quality collaboratives: lessons from research, **345**
- congestive heart failure**, Relationship between hospital length of stay and quality of care in patients with congestive heart failure, **219**
- coronary heart disease**, National Service Frameworks as tools for quality improvement, **211**  
Secondary prevention following myocardial infarction: evidence from an audit in South Wales that the National Service Framework for coronary heart disease does not address all the issues, **230**
- Cover story**, A lesson for our times, **299**  
Getting into the red: a strategic step for safety, **107**  
Resuscitation trolleys: human factors engineering, **393**
- CyberSpace**, Cyber Space, **101, 200, 292**
- decision analysis**, Development and description of a decision analysis based decision support tool for stroke prevention in atrial fibrillation, **25**  
Development and preliminary evaluation of a clinical guidance programme for the decision about prophylactic oophorectomy in women undergoing a hysterectomy, **32**
- decision making**, Lessons learned from non-medical industries: the tragedy of the USS Greenville, **355**  
Scope and nature of prescribing decisions made by general practitioners, **137**  
Simulation for training is effective when . . . , **119**  
Value of a cognitive simulation in medicine: towards optimizing decision making performance of healthcare personnel, **163**
- decision support tools**, Decision support and safety of clinical environments, **69**
- depression**, Guideline adherence rates and interprofessional variation in a vignette study of depression, **214**  
Guideline adherence rates and interprofessional variation, **208**
- developing countries**, Improving the quality of health services in developing countries: lessons for the West, **301**
- diabetes**, Patients' Evaluation of the Quality of Diabetes Care (PEQD): development and validation of a new instrument, **131**  
Quality assessment for three common conditions in primary care: validity and reliability of review criteria developed by expert panels for angina, asthma and type 2 diabetes, **125**
- disclosure**, A system of medical error disclosure, **64**  
Telling patients the truth: a systems approach to disclosing adverse events, **7**
- doctor evaluations**, Comparison of patients' and general practitioners' evaluations of general practice care, **315**
- doctor-patient relationship**, Comparison of patients' and general practitioners' evaluations of general practice care, **315**
- drug prescribing**, Implementing a new drug record system: a qualitative study of difficulties perceived by physicians and nurses, **19**
- effectiveness bulletin**, Acupuncture, **92**
- Elwyn G. Shared Decision Making. Patient Involvement in Clinical Practice** book reviews, **297**
- equipment failure**, Preventable anesthesia mishaps: a study of human factors, **277**
- Ernest Amory Codman**, Ernest Amory Codman MD, **104**
- error**, Decision support and safety of clinical environments, **69**  
Human factors in accidents, **369**  
Lessons learned from non-medical industries: the tragedy of the USS Greenville, **355**
- error management**, Combating omission errors through task analysis and good reminders, **40**
- evaluation techniques**, Effectiveness of quality improvement: learning from evaluations, **85**
- evidence based medicine**, Interventions for the treatment and management of chronic fatigue syndrome/myalgic encephalomyelitis, **284**
- evidence based practice**, Ingredients for change: revisiting a conceptual framework, **174**
- expert panel**, Quality assessment for three common conditions in primary care: validity and reliability of review criteria developed by expert panels for angina, asthma and type 2 diabetes, **125**
- family practice**, A preliminary taxonomy of medical errors in family practice, **233**
- funding**, The end of the beginning: the strategic approach to patient safety research, **3**
- funnel plots**, Funnel plots for institutional comparison, **390**
- gallbladder disease**, Development of explicit criteria for cholecystectomy, **320**
- general practice**, Comparison of patients' and general practitioners' evaluations of general practice care, **315**  
Scope and nature of prescribing decisions made by general practitioners, **137**

- glue ear**, Impact of national guidelines on use of surgery for glue ear in England, **118**  
Reduction in the use of surgery for glue ear: did national guidelines have an impact?, **121**
- guideline adherence**, Guideline adherence rates and interprofessional variation in a vignette study of depression, **214**  
Guideline adherence rates and interprofessional variation, **208**
- guidelines**, Impact of national guidelines on use of surgery for glue ear in England, **118**  
Reduction in the use of surgery for glue ear: did national guidelines have an impact?, **121**
- hip fracture**, Quality improvement for patients with hip fracture: experience from a multi-site audit, **239**
- homoeopathy**, Homoeopathy, **189**
- human error theory**, Should we consider non-compliance a medical error?, **81**
- human factors engineering**, Human factors engineering and patient safety, **352**
- incident reporting**, Barriers to incident reporting in a healthcare system, **15**  
Barriers to incident reporting, **7**  
Incident reporting: science or protoscience? Ten years later, **144**  
Lessons from the Australian Patient Safety Foundation: setting up a national patient safety surveillance system—is this the right model?, **246**  
Scope and nature of prescribing decisions made by general practitioners, **137**
- information technology**, Information technology and medication safety: what is the benefit?, **261**
- inhalers**, Inhaler devices for the treatment of asthma and chronic obstructive airways disease (COPD), **376**
- interprofessional variation**, Guideline adherence rates and interprofessional variation in a vignette study of depression, **214**  
Guideline adherence rates and interprofessional variation, **208**
- journalology**, Writing for *Quality and Safety in Health Care*: it may be easier than you think, **304**
- JournalScan**, JournalScan, **98, 197, 289, 383**
- latent failures**, Barriers to incident reporting, **7**
- law**, A system of medical error disclosure, **64**  
Quality in health care: a role for the law?, **88**
- leadership**, Leading organisational learning in health care, **51**  
Quality collaboratives: lessons from research, **345**
- learning organisation**, Ingredients for change: revisiting a conceptual framework, **174**
- length of in-hospital stay**, Length of in-hospital stay and its relationship to quality of care, **209**  
Relationship between hospital length of stay and quality of care in patients with congestive heart failure, **219**
- literature searches**, External research service with critical appraisal of the medical literature at a university medical centre, **297**
- Loughlin M. Ethics, Management and Mythology: Rational Decision Making for Health Service Professionals** book reviews, **106**
- martyrs of quality**, Ernest Amory Codman MD, **104**  
Introducing a new series, **103**
- mediation**, A system of medical error disclosure, **64**
- medical education**, Educating physicians prepared to improve care and safety is no accident: it requires a systematic approach, **168**  
Finding safety in medical education, **109**
- medical error**, Should we consider non-compliance a medical error?, **81**
- medical errors**, A preliminary taxonomy of medical errors in family practice, **233**  
A system of medical error disclosure, **64**  
Breaking bad news, **206**  
Pushing the profession: how the news media turned patient safety into a priority, **57**  
Simulation for training is effective when . . . , **119**  
Telling patients the truth: a systems approach to disclosing adverse events, **7**  
Value of a cognitive simulation in medicine: towards optimizing decision making performance of healthcare personnel, **163**
- medical information**, External research service with critical appraisal of the medical literature at a university medical centre, **297**
- Medical Practice Information Demonstration Project**, John Williamson and the terrifying results of the Medical Practice Information Demonstration Project, **387**
- medical records**, Implementing a new drug record system: a qualitative study of difficulties perceived by physicians and nurses, **19**
- myalgic encephalomyelitis**, Interventions for the treatment and management of chronic fatigue syndrome/myalgic encephalomyelitis, **284**
- myocardial infarction**, Secondary prevention following myocardial infarction: evidence from an audit in South Wales that the National Service Framework for coronary heart disease does not address all the issues, **230**
- National Institute for Clinical Excellence. Principles for Best Practice in Clinical Audit** book reviews, **392**
- National Service Framework**, National Service Frameworks as tools for quality improvement, **211**  
Secondary prevention following myocardial infarction: evidence from an audit in South Wales that the National Service Framework for coronary heart disease does not address all the issues, **230**
- news media**, Breaking bad news, **206**  
Pushing the profession: how the news media turned patient safety into a priority, **57**
- non-compliance**, Should we consider non-compliance a medical error?, **81**
- nurse assessment**, Patient and nurse assessment of quality of care in postoperative pain management, **327**
- nursing**, Progress of unit based quality improvement: an evaluation of a support strategy, **308**
- obituary**, John Meyer Eisenberg, MD, **195**
- omission affordances**, Combating omission errors through task analysis and good reminders, **40**
- online submission**, New *QSHC* online submission and review system: important message for all authors and reviewers, **5**
- oophorectomy**, Development and preliminary evaluation of a clinical guidance programme for the decision about prophylactic oophorectomy in women undergoing a hysterectomy, **32**
- organisational barriers**, Implementing a new drug record system: a qualitative study of difficulties perceived by physicians and nurses, **19**
- organisational learning**, Leading organisational learning in health care, **51**
- Øvretveit J. Action Evaluation of Health Programmes and Changes: A Handbook for a User-Focused Approach** book reviews, **392**
- pain**, Acupuncture, **92**
- PARIHS framework**, Ingredients for change: revisiting a conceptual framework, **174**
- patient assessment**, Patient and nurse assessment of quality of care in postoperative pain management, **327**
- patient evaluation**, Comparison of patients' and general practitioners' evaluations of general practice care, **315**  
Patients' Evaluation of the Quality of Diabetes Care (PEQD): development and validation of a new instrument, **131**
- patient preference**, Capturing what matters to patients when they evaluate their hospital care, **306**  
Development and description of a decision analysis based decision support tool for stroke prevention in atrial fibrillation, **25**  
Development and preliminary evaluation of a clinical guidance programme for the decision about prophylactic oophorectomy in women undergoing a hysterectomy, **32**  
Patients' experiences and satisfaction with health care: results of a questionnaire study of specific aspects of care, **335**  
Research on patients' views in the evaluation and improvement of quality of care, **153**
- patient safety**, Anxiety as a barrier to risk management, **115**  
Breaking bad news, **206**  
Championing patient safety: going global, **112**  
Educating physicians prepared to improve care and safety is no accident: it requires a systematic approach, **168**  
Finding safety in medical education, **109**  
From patients to politicians: a cognitive engineering view of patient safety, **302**  
Human factors engineering and patient safety, **352**  
Improving safety on the front lines: the role of clinical microsystems, **45**  
Information technology and medication safety: what is the benefit?, **261**  
Learning from prescribing errors, **258**  
Lessons from the Australian Patient Safety Foundation: setting up a national patient safety surveillance system—is this the right model?, **246**  
Medical applications of industrial safety science, **205**  
Patient safety research: does it have legs?, **113**  
Patient safety: what about the patient?, **76**  
Pediatric Peri-Operative Cardiac Arrest (POCA) Registry, **210**  
Pushing the profession: how the news media turned patient safety into a priority, **57**  
Risk management or safety first?, **116**  
Scope and nature of prescribing decisions made by general practitioners, **137**  
Setting priorities for patient safety, **224**  
The need for risk management to evolve to assure a culture of safety, **158**  
Unexpected cardiac arrest among children during surgery: a North American registry to elucidate the incidence and causes of anesthesia related cardiac arrest, **252**

- patient satisfaction**, Capturing what matters to patients when they evaluate their hospital care, **306**  
 My adventures as a hospital patient, **365**  
 Patients' experiences and satisfaction with health care: results of a questionnaire study of specific aspects of care, **335**
- patient-caregiver communication**, After Bristol: putting patients at the centre, **186**  
 Patient centred care: essential but probably not sufficient, **117**  
 Patient safety: what about the patient?, **76**
- patients' cultures**, Consumer involvement—a vital piece of the quality quilt: the California HealthCare Foundation's strategy for engaging California consumers, **181**
- patients' views**, Consumer involvement—a vital piece of the quality quilt: the California HealthCare Foundation's strategy for engaging California consumers, **181**  
 Patient safety: what about the patient?, **76**  
 Research on patients' views in the evaluation and improvement of quality of care, **153**
- Pediatric Peri-Operative Cardiac Arrest (POCA) Registry**, Pediatric Peri-Operative Cardiac Arrest (POCA) Registry, **210**  
 Unexpected cardiac arrest among children during surgery: a North American registry to elucidate the incidence and causes of anesthesia related cardiac arrest, **252**
- performance indicators**, Funnel plots for institutional comparison, **390**  
 Hospital success rate: a multidimensional indicator of prognosis, **390**
- postoperative pain**, Patient and nurse assessment of quality of care in postoperative pain management, **327**
- practice based research**, Improving safety on the front lines: the role of clinical microsystems, **45**
- prescribing errors**, Information technology and medication safety: what is the benefit?, **261**  
 Learning from prescribing errors, **258**  
 Prescribing errors in hospital inpatients: their incidence and clinical significance, **340**
- prescribing habits**, Scope and nature of prescribing decisions made by general practitioners, **137**
- press**, Pushing the profession: how the news media turned patient safety into a priority, **57**
- primary care**, A preliminary taxonomy of medical errors in family practice, **233**  
 Research methods used in developing and applying quality indicators in primary care, **358**
- primary care groups/trusts**, Implementing clinical governance in English primary care groups/trusts: reconciling quality improvement and quality assurance, **9**  
 Why don't physicians enthusiastically support quality improvement programmes?, **6**
- prognosis**, Hospital success rate: a multidimensional indicator of prognosis, **390**
- psychometrics**, Patients' Evaluation of the Quality of Diabetes Care (PEQD): development and validation of a new instrument, **131**
- qualitative methods**, Qualitative methods in research on healthcare quality, **148**  
 Research methods used in developing and applying quality indicators in primary care, **358**
- qualitative research**, Qualitative methods in research on healthcare quality, **148**  
 Qualitative versus quantitative research — balancing cost, yield and feasibility, **146**  
 Research methods used in developing and applying quality indicators in primary care, **358**
- quality evaluation**, Evaluation of quality improvement programmes, **270**  
 Improving the quality of health services in developing countries: lessons for the West, **301**
- quality improvement**, Capturing what matters to patients when they evaluate their hospital care, **306**  
 Educating physicians prepared to improve care and safety is no accident: it requires a systematic approach, **168**  
 Effectiveness of quality improvement: learning from evaluations, **85**  
 Evaluation of quality improvement programmes, **270**  
 Finding safety in medical education, **109**  
 Implementing clinical governance in English primary care groups/trusts: reconciling quality improvement and quality assurance, **9**  
 Improving safety on the front lines: the role of clinical microsystems, **45**  
 Ingredients for change: revisiting a conceptual framework, **174**  
 Lessons from the Australian Patient Safety Foundation: setting up a national patient safety surveillance system—is this the right model?, **246**  
 Lessons learned from non-medical industries: root cause analysis as culture change at a chemical plant, **266**  
 National Service Frameworks as tools for quality improvement, **211**  
 Optimizing quality collaboratives, **307**
- Patient and nurse assessment of quality of care in postoperative pain management, **327**  
 Patients' experiences and satisfaction with health care: results of a questionnaire study of specific aspects of care, **335**  
 Progress of unit based quality improvement: an evaluation of a support strategy, **308**  
 Quality collaboratives: lessons from research, **345**  
 Quality improvement for patients with hip fracture: experience from a multi-site audit, **239**  
 Shame: the elephant in the room, **2**  
 Why don't physicians enthusiastically support quality improvement programmes?, **6**
- quality improvement research**, Can the sum of projects end up in a program? The strategies that shape quality of care research, **212**  
 Improving the quality of health services in developing countries: lessons for the West, **301**  
 Quality improvement research: understanding the science of change in health care, **110**  
 Research on patients' views in the evaluation and improvement of quality of care, **153**
- quality of care**, Consumer involvement—a vital piece of the quality quilt: the California HealthCare Foundation's strategy for engaging California consumers, **181**  
 Improving the quality of health services in developing countries: lessons for the West, **301**  
 Length of in-hospital stay and its relationship to quality of care, **209**  
 Patients' Evaluation of the Quality of Diabetes Care (PEQD): development and validation of a new instrument, **131**  
 Qualitative methods in research on healthcare quality, **148**  
 Quality assessment for three common conditions in primary care: validity and reliability of review criteria developed by expert panels for angina, asthma and type 2 diabetes, **125**  
 Quality in health care: a role for the law?, **88**  
 Relationship between hospital length of stay and quality of care in patients with congestive heart failure, **219**
- Quality and Safety Health Care**, New QSHC online submission and review system: important message for all authors and reviewers, **5**
- Quality and Safety in Health Care**, *Quality and Safety in Health Care*: a time of transition, **1**
- Quality and Safety in Health Care** Shame: the elephant in the room, **2**
- quantitative research**, Qualitative versus quantitative research — balancing cost, yield and feasibility, **146**
- reminders**, Combating omission errors through task analysis and good reminders, **40**
- risk management**, Anxiety as a barrier to risk management, **115**  
 Barriers to incident reporting in a healthcare system, **15**  
 Barriers to incident reporting, **7**  
 Risk management or safety first?, **116**  
 The need for risk management to evolve to assure a culture of safety, **158**
- root cause analysis**, Lessons learned from non-medical industries: root cause analysis as culture change at a chemical plant, **266**
- safety**, Decision support and safety of clinical environments, **69**  
 Preventable anesthesia mishaps: a study of human factors, **277**
- safety culture**, Lessons learned from non-medical industries: root cause analysis as culture change at a chemical plant, **266**
- safety management**, Medical applications of industrial safety science, **205**
- safety research**, The end of the beginning: the strategic approach to patient safety research, **3**
- secondary prevention**, Secondary prevention following myocardial infarction: evidence from an audit in South Wales that the National Service Framework for coronary heart disease does not address all the issues, **230**
- shame**, Pushing the profession: how the news media turned patient safety into a priority, **57**  
 Shame: the elephant in the room, **2**
- Simpson L, Robinson, eds. Review of e Clinical Governance: A Guide for Primary Care** book reviews, **391**
- simulation**, Simulation for training is effective when . . . , **119**
- strategic management simulation**, Value of a cognitive simulation in medicine: towards optimizing decision making performance of healthcare personnel, **163**
- stroke prevention**, Development and description of a decision analysis based decision support tool for stroke prevention in atrial fibrillation, **25**
- success rate**, Hospital success rate: a multidimensional indicator of prognosis, **390**
- task analysis**, Combating omission errors through task analysis and good reminders, **40**
- taxonomy**, A preliminary taxonomy of medical errors in family practice, **233**
- teamwork**, After Bristol: putting patients at the centre, **186**  
 Leading organisational learning in health care, **51**

- Lessons learned from non-medical industries: the tragedy of the USS Greenville, **355**
